

# Spot on Lighting LED Retrofit Kit for Nulux Squarelux 4

Squarelux's 4"x4" trimless aperture was filled with a prismatic lens that was coplanar with the ceiling. It's surface simply became an extension of the surface of the ceiling.

Behind the lens was an adjustable object/accent light the same as Spotlux except that all the parts were finished in a low gloss white.

The prismatic lens spread out some of the projected light beam creating an ambient fill in the room, softening its contrast, while the white interior added a harmonious balance. Squarelux holds a unique place in lighting layouts somewhere between Spotlux and Washlux.

The LED retrofit kit lampholder assembly and power supply are swapped with the existing parts and connected to the same wiring and dimmers.

LED Lampholder Assembly

Power Supply

Model: SOL-SQ4-R-°K specify color temperature: 2700 3000  
specify dim-to-warm: 1830

- 1590 source lumens
